

Zhenting HE

CURRICULUM VITAE

November 25, 2024

✉ heyzhenting@gmail.com | www.zhentinghe.com | ☎ +86 159-2089-2958

RESEARCH INTERESTS

I research the intersections of cultural studies, particularly in terms of interplay among technology and culture. My recent work focuses on the critical analysis of digital media culture and digital activism. Methodologically, I am most inclined towards and frequently trained in qualitative research, with the specific method of semi-structured depth interview, analyzing empirical materials through thematic analysis informed by grounded theory. Other ongoing interests include digital journalism, digital feminism and comparative-historical methods.

EDUCATION

RESEARCH EXPERIENCE

Digital Media Culture Lab, Shenzhen University

February, 2023 - August, 2024

Student Research Assistant, advised by Professor Jiang CHANG

- Participated in four research projects focusing on media discourse and national narratives. My main work covered the entire research process, including literature review, data collection/interviewing, empirical analysis, and final writing revisions. The project gave me a broad understanding of communication dynamics, improved my knowledge of different research methods, and confirmed my decision to focus on qualitative research. In addition to my advisor Jiang CHANG, the project faculty include Wensen HUANG (Assistant Professor at Shenzhen University) and Hao TIAN (Young Associate Research Fellow at Fudan University).
- Managed the influential academic public platform "Media Culture Review" founded by my advisor, and as of August 2024, the account has 27,674 subscribers in China. Through this training, I have developed a better academic taste for the research directions of digital media culture and digital journalism, opened up international perspectives and learned to keep a close eye on international cutting-edge developments and seminars.
- Assisted my advisor in the revision of academic papers and research proposals, ensuring clarity, coherence, and adherence to academic publishing standards, which helps me a lot about English academic writing format.

National Survey Research Center, Renmin University of China

April - September, 2021

Internship Project Assistant

- Participated in interviews for five of China's larger research projects, including topics such as the Winter Olympics, carbon neutrality, and student employment. Through these projects, I learned the importance of scheduling interviews and being sincere, polite, and confident. This experience helped me build a strong foundation for conducting interviews in my qualitative research.
- Learned and mastered STATA and SPSS data analysis software to analyze the results of some of the questionnaires, enriching my better knowledge of statistics and data analysis ability, so that I can be more smooth when reading academic articles on related methods.
